

4. Extreme Abilities

Golden Eagle (*Aquila chrysaetos*)

Ability - Seeing detail at great distance

Its retina has cone cells known as "foveae" which are special concentrations of receptors. All these modifications suggest that the term "eagle-eyed" remains a fair description of outstanding vision. It can sight a rabbit from a distance of about 3.2km. Their eyes are tubular, with ample pupil, and it can focus the image with speed and clarity

4.4 Keenest eyesight

Geographical Distribution – Spread throughout Northern Hemisphere

1992- Error Golden Eagle
Displayed is plate block
With top left stamp having black color omission.

1970
Stamps booklet of decimal definitive

Meter Cancellation

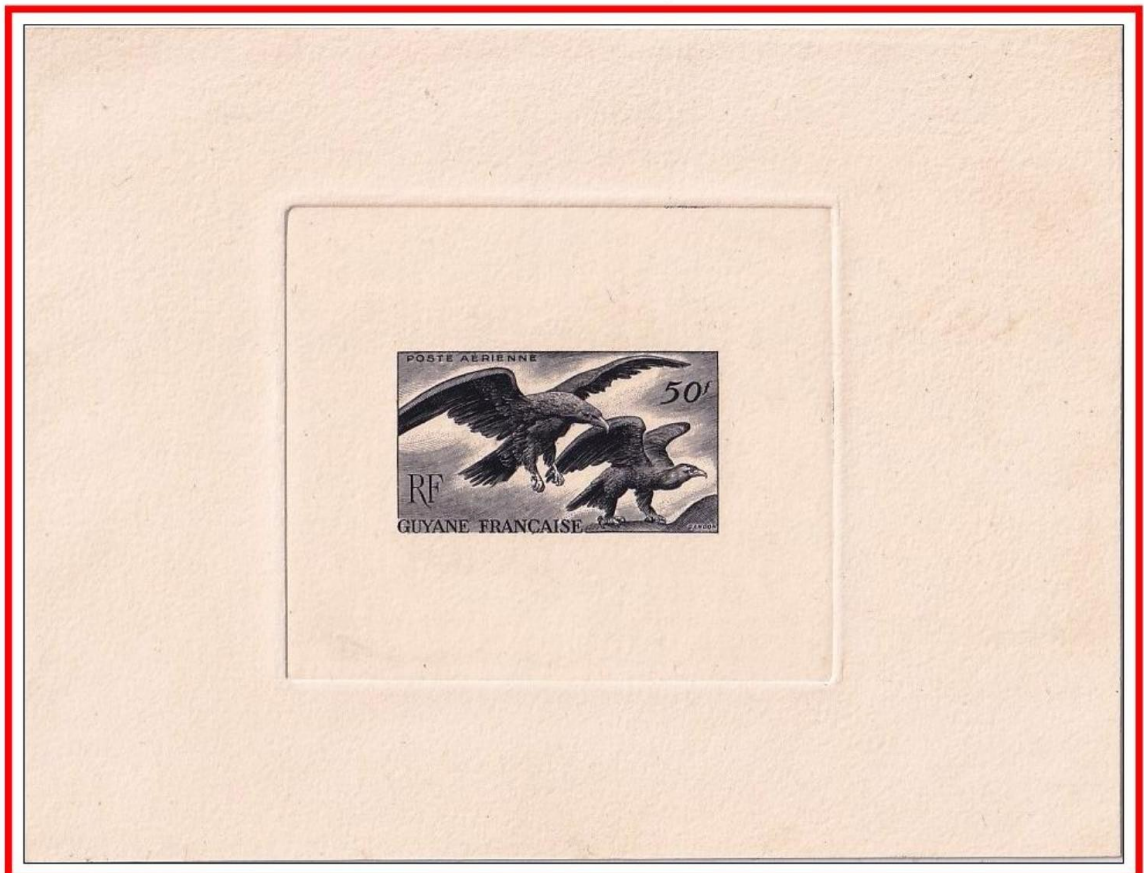

Displayed below is a cut square of the window cover, commercially used in France, 1982, depicts the Bird. A postage meter or franking machine is a mechanical device used to create and apply physical evidence of postage to mailed matter. Postage meters are regulated by a country's postal authority. A postage meter imprints an amount of postage, functioning as a postage stamp, a cancellation and a dated postmark all in one.

Black Caracara (*Daptrius ater*)

A common subject of folklore and legends throughout Central and South America, the Crested Caracara is sometimes called the "Mexican eagle."

Although it looks like a long-legged and eagle, Caracara is actually a falcon, and an "opportunistic feeder", This bird of prey too has tremendous eyesight

1947 - Sunken Die Card, Wove paper. Engraver and designer is famous P. Gandon
