

## 6. Extreme Form

**Marabou Stork** (*Leptoptilos crumeniferus*)

**Attribute** - Being shockingly ugly

## 6.6 Ugliest Looks

EXTREME BIRDS

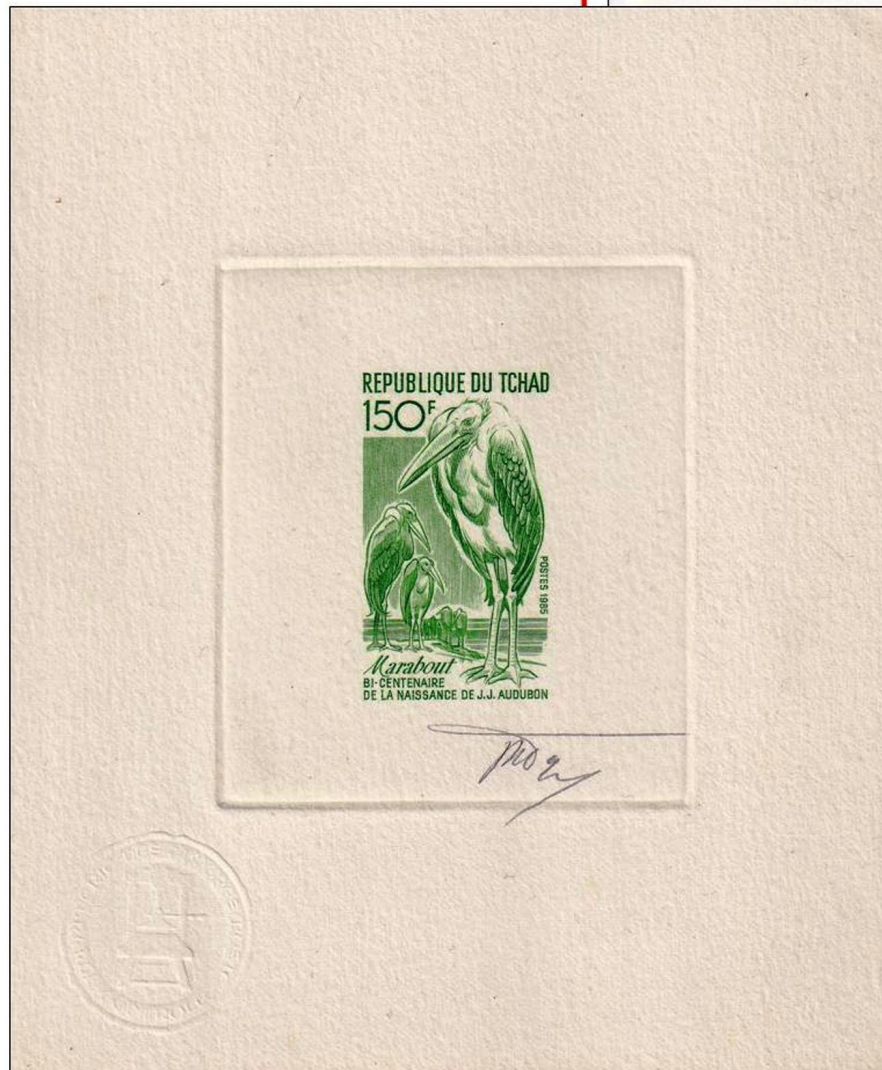

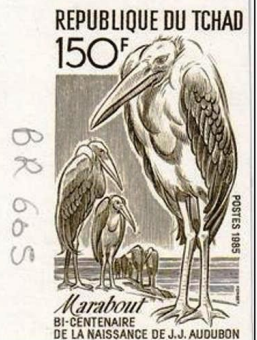

**Geographical Distribution** - Sub Saharan Africa

It only takes a glance at the photograph to appreciate self evident hideousness of the Marabou stork. It's a bird of death, a scavenger that spends a good deal of its time around corpses. Sometimes those of humans, picking off little bits of flesh at the edge of the bone tripping scrum.

1991. Imperf MS

68724

Composite Imperf color trial, plate block No 68724 With marginal jewels on selvage. This stamp was issued on 20.07.1985, to commemorate 200 years of JJ Audubon, the famous Ornithologist and a wild life American painter. Artworks done by Audubon were adopted and retained for other 3 issues of this set of 4 stamps.

1965. Artist signed sunken proof in green. Signed by the artist "ROBERT CAMIL"
