

12. Fishing Vessels

Fishing vessels are indispensable to maritime operations. They fulfil a vital need for reconciling demand with supply in the fisheries sector so much so that in their absence, a quite simple yet equally essential activity would come to a standstill.

As is in any domain, even in the aspect of fishing boats, various evolutionary methodologies have come to be adopted over the course of time. Presently there are numerous types of fishing vessels that are in operation in the maritime industry, each with a purposeful quality unique to its own. Deep-sea fishing is an arduous task because to catch the desired sort of fish one must face the complexity and uncertainties of oceans. The trawler, the modern fishing vessel, was developed in the 19th century.
